

Brand guidelines

Identity standards for MatchMySolicitor — the UK service matching people with specialist employment law solicitors. Version 1.0, July 2026.

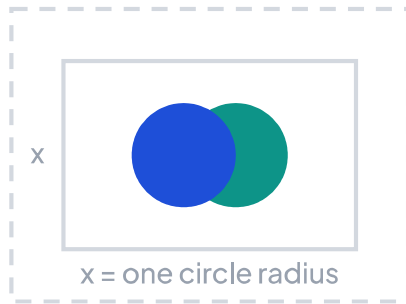

01 · THE MARK

Two circles of equal weight coming together: the client and the solicitor, meeting in the middle. The blue circle leads — the person seeking help — and the teal circle answers. No scales, no gavels; just the match.

One geometric idea, no fine detail. It stays legible at 16 px and unmistakable at 32 px favicon size.

02 · CLEAR SPACE & MINIMUM SIZE

Keep clear space equal to one circle radius on all sides of any lockup.

-  **MatchMySolicitor** Horizontal lockup: never below 140 px wide
-  Icon: never below 16 px

03 · LOCKUPS & VARIANTS

PRIMARY — HORIZONTAL

Default for website header, email, documents and anywhere width allows.

STACKED

MatchMySolicitor

For narrow spaces: app splash, square ads, footers.

ICON ONLY

Favicon and social avatars. Shown at 72 / 32 / 16 px.

SINGLE COLOUR

MatchMySolicitor

For print, engraving, faxed documents. The teal circle becomes an outline ring so the pairing survives without colour.

REVERSED

MatchMySolicitor

For dark backgrounds. The blue circle becomes white; teal is retained.

04 · COLOUR

Solicitor Blue

#1E4FD8 · primary. The leading circle, links, buttons.

Match Teal

#0D9488 · accent. Mark only — never for body text or large fills.

Ink

#1A1F26 · text and dark backgrounds.

Three colours maximum, plus white. No gradients, tints or additional accents.

05 · TYPOGRAPHY

MatchMySolicitor

Plus Jakarta Sans

The only brand typeface. Wordmark: “Match” at Bold 700, “MySolicitor” at Medium 500, letter-spacing -0.01em . Set as one word, no spaces, never with a tagline attached.

Weights in use

700 for headings and emphasis, 500 for body and UI. Never use light weights or italics in the identity.

06 · USAGE RULES

Do

- Use the horizontal lockup by default
- Use the single-colour version when colour is unavailable
- Place the logo on white, #FAFBFC or Ink backgrounds only
- Scale proportionally from the supplied SVG files

Don't

- Recolour, outline, add gradients or shadows to the mark
- Separate the circles or change their overlap
- Set the wordmark in another typeface or add spaces
- Place the colour logo on photography or busy patterns

All variants are supplied as SVG files in the asset pack. Concept: [1a · Unity](#).
